

pyrite::random::operator=

```
graph LR; A[pyrite::random::operator=] --> B[pyrite::random::reset]
```

A diagram showing a transition from a state labeled 'pyrite::random::operator=' to another state labeled 'pyrite::random::reset'. The first state is in a gray box, and the second is in a white box. A blue arrow points from the first box to the second.

pyrite::random::reset
